

- Wider process/design
 - Diagnosis & action plan – how does it work?
 - Could it be used for forestry
 - Compatible with existing admin systems?
 - How to start?
 - Scaling up EIP – ACRES – what was involved
 - Who designs & approves scorecards? Resource needs? Boots on ground?
 - Multiple objectives on scorecard?
 - Balancing habitat requirements vs. animal health concerns
 - Coping with narrow scoring window
 - Paying agency priorities
 - Ensuring conceptual headroom
 - ‘Threats & pressures’ – predators?
 - Approach to catchments
- Farmer attitude/relations
 - Voluntary in Ireland?
 - Uptake in ACRES CP vs. ‘icing on top’ EIPs?
 - Self-declaration risk
 - Admin time for farmer
 - Farmer attitude to annual training requirement
 - Farmer reaction to decreasing payment
 - How to balance autonomy vs feeling of guidance?
 - Farmer reaction to app in AT
 - Negative impacts not farmers’ fault
 - Farmer mental health?
 - Benefit to farmers’ business?

- Advisory/admin staffing
 - Staff requirement
 - Can advisory support be delivered remotely?
 - Is IE advisory system a blockage rather than an aide to farmer understanding?!
- Survey/scoring issues
 - Use of geotagged photos for control?
 - Internet/wifi issues?
 - Scale of farmer support – how many farmers per staff member?
 - Frequency of reassessment?
- Communications challenges
- Collectives in NL – any intervention/guidance in how money shared? How does it work in practice?
- Payment related issues
 - Irish payments as % of total receipts
 - Transaction costs?
- Government issues
 - Social value?
 - How best to work in co-design going forward?
